JOB KNOWLWDGE AND SKILL	5 ()	4 ()	3 ()	2 ()	1 ()
QUALITY OF WORK	5 ()	4 ()	3 ()	2 ()	1 ()
Initiative And Motivation	5 ()	4 ()	3 ()	2 ()	1 ()
Team work	5 ()	4 ()	3 ()	2 ()	1 ()
General product	5 ()	4 ()	3 ()	2 ()	1 ()
Discipline	5 ()	4 ()	3 ()	2 ()	1 ()

OVERALL PERFORMANCE RATING

Substantially exceeds job requirements	Exceeds job requirements	Meets job requirements	Partial meets job requirements	Does not meets most job requirements
5 ()	4 ()	3 ()	2 ()	1 ()

Signature of supervisor _____

LEARNING OBJECTIVES

By the end of OMFS training the candidate should be able to

Clinical OPD work:

1. **Clinical Skills Development:** Trainees should develop proficiency in performing various surgical procedures related to the mouth, jaws, face, and neck, including dental extractions, , trauma management, dental implant placement, salivary gland disorder and management of cyst and tumors
2. **Diagnosis and Treatment Planning:** Understand the principles of diagnosing oral and maxillofacial conditions, interpreting diagnostic imaging such as CT scans and X-rays, and formulating comprehensive treatment plans.
3. **Anesthesia and Pain Management:** Gain knowledge and experience in administering different types of anesthesia for surgical procedures, as well as managing pain and complications related to anesthesia.
4. **Patient Care and Communication:** Develop effective communication skills to interact with patients, educate them about their conditions and treatment options, and provide compassionate care throughout the treatment process.
5. **Medical Knowledge:** Acquire in-depth knowledge of oral and maxillofacial anatomy, physiology, pathology, pharmacology, and microbiology relevant to surgical interventions in this specialty.
6. **Team Collaboration:** Work collaboratively with other healthcare professionals such as dentists, orthodontists, physicians, anesthesiologists, and nurses to ensure comprehensive patient care.
7. **Ethical and Legal Considerations:** Understand the ethical principles governing patient care, consent, confidentiality, and the legal aspects related to surgical practice in oral and maxillofacial surgery.
8. **Emergency Management:** Develop skills to handle emergencies and complications that may arise during or after surgical procedures, including managing bleeding, infections, and airway obstruction.
9. **Research and Evidence-based Practice:** Appreciate the importance of research in advancing the field and utilize evidence-based practices in decision-making and patient care.
10. **Professional Development:** Embrace lifelong learning, engage in continuous professional development activities, and demonstrate professionalism in interactions with patients, colleagues, and the community.
